ENDOSCOPIC SPINE SURGERY: MINIMAL DOWN TIME, MAXIMUM UPSIDE

JOIN CMSNE, NHOC AND TEAL FOR AN
EDUCATIONAL AND NETWORKING EVENT

Thursday, March 12, 2026 – 6 PM

NHOC, 175 Rockingham Rd., Londonderry, NH

Light Dinner Included

This presentation offers a concise overview of endoscopic spine surgery, highlighting common cervical, thoracic, and lumbar procedures and their clinical applications. It will review key benefits such as lower infection rates, reduced surgical morbidity, preservation of spinal structures, and faster recovery, particularly in higher-risk patients.

Potential complications and learning-curve considerations will be addressed, along with capital and operational factors, emphasizing the minimal downtime and maximum upside of endoscopic approaches for patients and healthcare systems.

FEATURED PRESENTER

MATTHEW W. WILKENING, MD
ADULT AND PEDIATRIC
ORTHOPEDIC SPINE SURGEON, NHOC
