

CMSNE's 2027 Hospital Based Case Management Conference - Case Manager Playbook 2027: Changes and Challenges

to be held in two parts on Saturday, January 23 and February 6, 2027

Overall Acute Hospital Conference Purpose Statement

Case Managers are facing very real challenges with looming federal and state program cutbacks and reimbursement limitations while navigating new program requirements. The 2027 Acute Hospital Conference will present a playbook of real-world strategies to effectively navigate both internal and external factors challenging our work. Innovation in assessment and complex discharge planning techniques along with timely regulatory updates reinforce compliant, cutting-edge practice and optimize the financial impact of Case Management practice. The Case Manager Playbook 2027 will round out updates with exciting information on certification opportunities recognizing excellence in Professional Case Management practice.

Overall Conference Learning Objectives

At the conclusion of this conference attendees will be able to:

- Apply strategies to support high-risk transitions across the continuum of care.
- Interpret Medicare Conditions of Participation accurately.
- Integrate changes in federal regulations accurately into practice.
- Calculate the value of case management to the organization.
- Demonstrate skill with integrating the Behavioral Health Pathway to effectively assess medical, psychiatric, and psychosocial needs of patients.
- Defend the impact of certification on validating expertise in Case Management practice.
